I like Spring because...

I like Spring because the lambs are hopping around and the flowers are blooming in great bright colours such as Pink, yellow, Purple, blue and Orange. The grass is bright green in colour. The fields are growing with gorgeous crops of golden corn. The breeze is blowing through the trees. The bees are out and about buzzing from flower to flower, collecting pollen. The butterflies are flying with their great bright coloured wings. They are all symmetrical and all the same. The children are running, jumping and skipping around outside. Icecream vans are buzzing around the town selling All the different flavoured ice creams you can think of such as; Mint, Chocolate, banana and Strawberry and much more. The thing I like most about Spring is the nice cool weather. With a cool breeze and the sun just perfectly warm but not quite glowing. I like going down to the rivers and ponds, dipping my feet in the icy water and climbing the tree tops with the breeze lifting my hair out of my face. And Something to look forward to... the Summer. So we should enjoy Spring while it lasts. It will always come back year, on year. It's never gone. In my opinion it's the best Season of all.
